

14th October 2022

Dear Parent/Carer

Year Five Laser Sky Tour

This term, Year Five are learning all about space in science and across the curriculum. To support this, we are really pleased to say that the St. Neots Astronomy Association are coming to the school to lead a Laser Sky Tour lasting approximately an hour and a half.

Date: **Tuesday 1st November**

Time: **17:45 arrival for a 18:00 start.** Entrance is via the front office and into the hall.

You and your child (and any other interested family members) are invited to come along and learn how to find the Pole Star and a range of constellations.

The event will start with the St. Neots Astronomy Association leading a fantastic talk indoors about the solar system.

Following the talk, there will be telescopes set up to view the craters on the moon and perhaps even a galaxy. Providing the weather co-operates, these provide the opportunity to experience some awe-inspiring views.

If the weather is poor, please still come along: the talk alone is well worth the trip.

Please note: children **may not** attend the event without adult supervision.

The tour is funded by the school and free to everyone in Year Five.

Please register the number of attendees via [this Google Form](#) by **Monday 24th October**.

Yours sincerely

Angela Connor

Head of Year Five
